

## Assignment 06

### Responsive + jQuery exercise

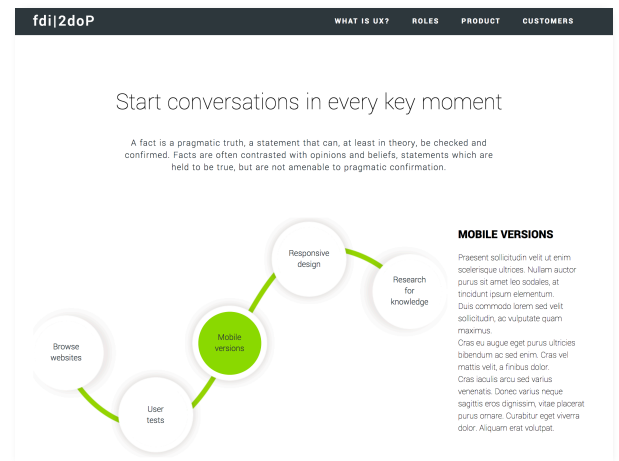

#### Instructions:

Add the missing functionality to the following webpage and the media queries needed to make it responsive. You can check the final result in the video: <https://goo.gl/EXP0r4>

→ Show the selected section when the user clicks on the list element (all the sections are already in the HTML, only hidden) using a **fadeIn** effect. Add a Green background (#8fd700) to the selected **A** tag.

Example: if the user clicks on “**Mobile versions**”

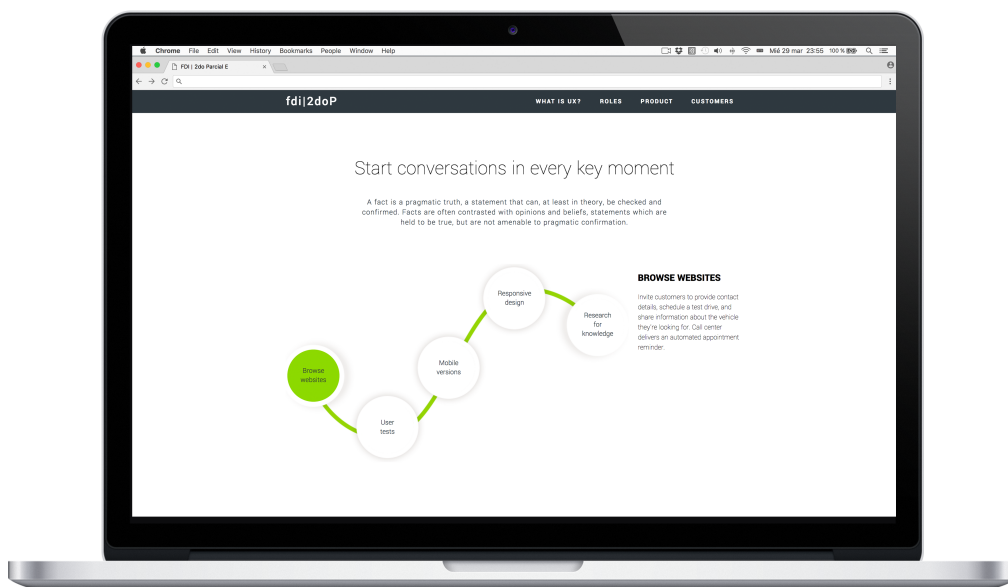

#### Responsive

Make a responsive mobile view under the breakpoint of 1000px.

Adapt the layout by stacking the elements.

Add a hamburger menu icon to show/hide the menu.

#### Mobile view
